## Experience

### **Full Stack/Design Projects**

**Jan 2019 – Present**

I've worked on making wireframes and low/high fidelity prototypes for UX/UI development to further develop my skills in Full Stack development. I also do Font-End/Back-end development as well I've made multiple mock websites and very knowledge setting up databases and API's.

### **Drone Swarm Search and Rescue**

**Jan 2021 – March 2023**

It's a drone swarm search and rescue in which a group of ten drones go into a forest and search for people that are lost due to natural disasters. My job in this project was to make a reliable collision algorithm so the drones would not collide with anything.

## Education

**AA in applied Arts, University of Miami-Dade**

**BS in Computer Science, University of Central Florida**

## Technical Skills

- Strong knowledge in Java, Python, TypeScript, JavaScript, MERN stack, React, MySQL
- Strong knowledge in making wireframes & prototypes using Adobe XD and Figma.
- Ability to collaborate effectively with team

## Design Skills

- Information Architecture
- Wireframe
- Interactive Design
- Interface Design
- Design System
- Rapid Prototyping

## Certifications

Google UX Design
